2011 Summer Science Nights

A HOWLING GOOD TIME!

About Summer Science Nights

Our *Summer Science Nights* are a great way to enrich your child's understanding of science in the best laboratory of all — the great outdoors. Each session includes hands-on, minds-on activities and an action-packed hike on one of our wildlife-rich preserves.

Date/Time: Wednesdays in June and Thursdays in July
All classes from 6 PM - 8 PM

Classes:

- June 15 & July 14 | Moonstruck: The Dynamic Moon
- June 22 & July 21 | Bug Talk: World of Insect Communication
- June 30 & July 28 | Prairie Dogs: Coyotes, Foxes, and Wolves, oh my!

Location: All classes held at Indiangrass Preserve

Audience: Classes are designed for 5 - 10 year olds.

Registration extremely limited. See page 3 for details on how to register.

Summer Science Nights

A Howling Good Time!

Your evening adventure awaits...

The Katy Prairie is a place for big adventures. In the cool of the evening you are sure to spot wildlife moving about and witness spectacular sunsets. If you're ready to explore this shadowy world of adventure then our *Summer Science Nights* are for you! We'll play games, do crafts, run simple experiments, and take fun-filled hikes to discover some of the sensational science behind the prairie's wildlife and history.

Moonstruck - June 15th & July 14th

The moon may look like just another big rock in space but it has had an amazing history.

We'll explore some of the huge forces that shaped the moon by simulating lava flows and meteor impacts. We'll also learn to identify major features of the moon with the naked eye and discover how the moon affects animals.

Bug Talk - June 22nd & July 21st

Insects use chirps, squeaks, rattles, hums, flashes, and smells (both pleasant and not) to talk to one another.

Join our "insect band" as we pop, scrape, whistle our way into a better appreciation of insect communication using common household items and games.

FIREFLY

SOUTHERN MOLE CRICKET

Prairie Dogs - June 29th & July 28th

There's nothing more thrilling, or wild, than hearing the howling or yipping of a wild dog! The Katy Prairie is home to several cousins of the family pet, including coyotes and two types of foxes. It was also once home to the red wolves.

GRAY FOX

COYOTE OR PRAIRIE WOLF

Experience life as a wild dog by trying to sniff out prey, find your place in your "wolf pack", and even discover why a wet nose is better than a dry one!
