This is not a complete list of all species recorded on the Katy Prairie in west Harris, east Waller, and northern Fort Bend Counties, Texas. Species only recorded once, twice or appearing to be accidental are not included (see note at end of checklist). Currently there is not a central repository for observation data. We encourage you to report your sightings on line via eBird at ebird.org.

Species names, taxonomic order, and family divisions follow the American Ornithologists' Union *Check-list of North American Birds, 7th Edition* and supplements (through the 49th supplement, 2008), <http://www.aou.org/checklist/north/full.php>. ► indicates species of conservation concern listed by the BirdLife International/National Audubon Society Important Bird Area program for Texas including federal and state endangered and threatened species.

S = summer resident and migrant; W = winter resident and migrant; M = migrant only, spring and/or fall; P = permanent resident or can occur at any time of year, but does not necessarily breed on the Katy Prairie; (presumed) = presumed to occur; rare = not expected every year or season, provide documentation for reports of rare species. Seasons indicated are when expected; there may be out-of-season records for some species.
